(W) Width	18 1/2" (470mm)	15" (381mm)
(D) Depth	21 1/2" (546mm)	11 3/4" (299mm)

OBJECTIVE

The ROCK-on Limestone-82 outdoor speaker, is specifically designed to imitate rock-like appearance and easily blend in with any outdoor environment. Made with UV treated, weather-resistant enclosure materials and durable epoxy resin construction, the ROCK-on speakers can withstand the demanding outdoor elements.

The ROCK-on subwoofer, Limestone-10D features high power crossovers that reduce distortions and deliver pure sound that blends in with nature. These subs bring bass to your outdoor space, something that is greatly needed in today's rock speaker market. The Limestone-10D's port is "S" shaped so water cannot get trapped inside. We have tested and retested our subwoofer to ensure it is up to par with our reputable line of subs.

ROCK-on outdoor speakers are the ideal choice for listening to music in the garden, by the pool, in the yard, or on the patio.
