

# ROUGH-N-KITS

RK6IW  
BB6IW

Earthquake's new BB6IW and RK6IW back box and rough-in kits offer extreme ease of installation, with extra durable construction for high-performance in-wall speakers.

The new BB6 6-inch back box and RK6 6-inch rough in kit are sold separately for your convenience and are designed to integrate with each other seamlessly. Designed for quick professional installs, these new kits are colored red so that sheet rockers and installers will have no problem flowing quickly through a job site.

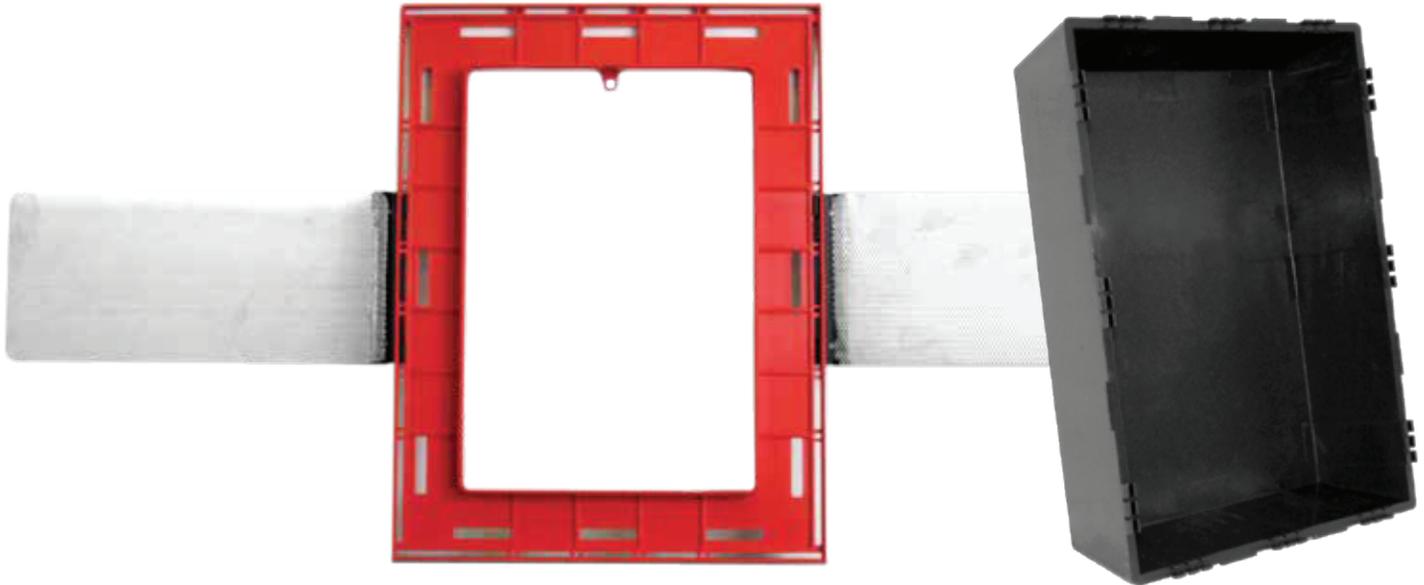

## **RK6IW FEATURES:**

- Extremely quick install
- Easy for Sheetrock installers to spot
- Aluminum dog ears for extreme installation flexibility
- Over 5/16" thick, fire retardant back box (sold separately)
- Fits all 6" in-wall speakers
- Designed to work with Turn-N-Lock™ installation
- Meets and exceeds all building codes
- High temp 2 hour fire retardant plastic
- Super resilient black box (optional)
