

# Edgeless IQ In-ceiling Speakers

## Product Release

Dual/Stereo

Single

## NEW EDGELESS DESIGN FOR BETTER AESTHETIC!

What does it take to reproduce the sound of a concert hall or the soundtrack of a movie in any room, without having any obtrusive or eye soring equipment? Very simple. It takes Earthquake Sound's newly re-designed Edgeless IQ in-ceiling speakers with dual swiveling neodymium silk dome tweeters and low mass woven glass fiber cone woofer.

Available in single and dual voice coil, as well as two different sizes, the options and possibilities to achieve the precise and powerful sound you desire are nearly endless.

With a pair of single voice coil IQ speakers you can adjust and aim the swiveling tweeters to fit the acoustics of your room pin pointing the "sweet spot" where the sound converges, enhancing your listening experience.

The dual voice coil can produce both left and right signals. This provides great stereo performance in hallways, bathrooms, or any location where it would be considered impractical to mount two ceiling speakers. And with the new elegant Edgeless design and paintable grille, you can discreetly integrate the speakers into any décor!

IQ speakers deliver deep, natural bass because of the patented PistonMax™ technology that provides 20% more surface area. Superb sonic accuracy is guaranteed by low mass woven glass fiber cone woofer and silk dome tweeters. Additionally, you can customize the sound of the speaker with mid-bass and tweeter adjustment switches that optimize the sound to the acoustics of the room or your personal preference.

**+/-3dB Crossover Selector:** allows you to equalize and tailor the sound to the rooms acoustics for a more well-rounded sound

- **Dual Silk NEO Tweeters:** allows the listener to direct the sound to create enveloping sound field
- **Low Mass Woven Glass Fiber Cone:** This high-end, light-weight, and stable cone provides a more powerful and purer sound
- **PistonMax™ Technology:** Adds 20% more surface area giving more air pressure for a more powerful sound
- **Turn-N-Lock™ Mechanism:** Makes fast, efficient, safe, and professional installations easy!
- **Spring-Loaded Gold Plated Terminals:** Fast and easy to connect, the gold plate provides superior connectivity
- **NEW Edgeless Design:** Provides a better, more discrete aesthetic to seamlessly integrate into your home
- **Paintable Magnetic Grille:** Paint the grille the same color as the installation area and watch your speaker virtually disappear
