

POWERHOUSE CLASS A/B

PRODUCT RELEASE

EARTHQUAKE SOUND

Sound That Will Move You.

PH1000W/2

PH800W/2

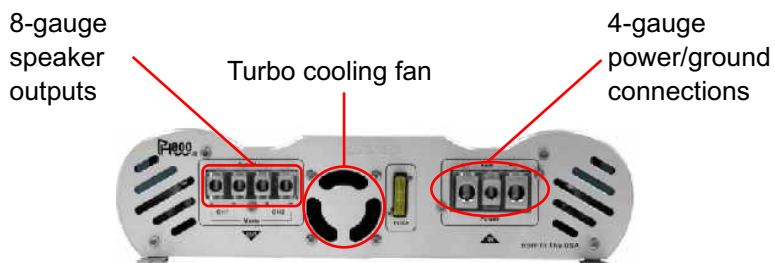

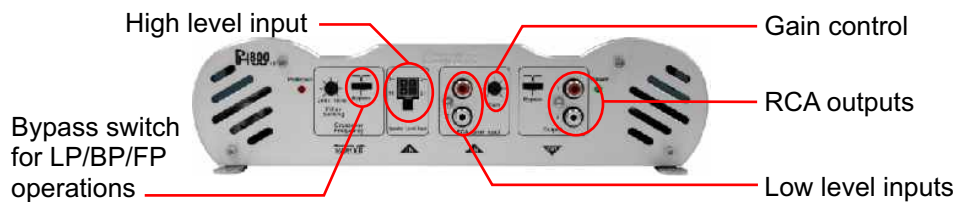

MADE FOR COMPETITION

The PowerHouse Class A/B amplifiers perform much better than any normal output stage on the market. This technology allows these amps to produce more power while putting less of a load on your vehicle's electrical system. This means more power to your speakers, no thermal shut-down problems, and longer play times than the competition. Additionally, they deliver an amazing frequency response and distortion as low as 0.001%.

Innovative features that PowerHouse amplifiers offer are Equal Loudness Control, precise frequency selector crossover, and 0-180 degree phase shift adjustments. The PowerHouse amps boast killer cosmetics and superior technological design.

FEATURES

- Massive 4-gauge power ground terminals
- Massive 8-gauge speaker connections
- 0-gauge power ground terminals for competition amps
- High level inputs/low level inputs and outputs
- High-pass/full-range/low-pass operation
- Built-in crossover, high-pass filter, & bass boost

	MSRP
PH800W/2	\$249.00
PH1000W/2	\$399.00
PH2200W/4	\$599.00

PH10,000W/D1

MADE FOR COMPETITION

Earthquake's Class-J amplifiers deliver far beyond your expectations with blazing performance, intelligent design, and unique features that are second to none. These killer amplifiers operate in the range of 95% efficiency.

Heat sink designs, larger input and output terminals, and precise fine-tuning have put the reigning champions in an untouchable category. The heat sink evenly distributes heat from the amplifier so the amp stays extraordinarily efficient and cool.

Class "J" PowerHouse amps even have power connections 4-gauge and larger. All of these design features and improvements will dramatically increase presentation, output capabilities, sound quality, and your status in the winner's circle.

FEATURES

- Massive 4-gauge power ground terminals
- Massive 8-gauge speaker connections
- 0-gauge power ground terminals for competition amps
- High level inputs/low level inputs and outputs
- High-pass/full-range/low-pass operation
- Built-in crossover, high-pass filter, & bass boost
