

MiniMe P8V2, P8WV2

Product Release

Elegance & Style

The MiniMe P8V2/P8WV2 amplifier utilizes the advanced class “D” circuitry with over 90% efficiency, allowing it to continuously perform without getting hot.

Earthquake’s own patented SLAPS passive radiator technology dramatically increases the subwoofer’s efficiency and capability for ultra low frequency reproduction. The unique design of the SLAPS employs dual (identical) suspensions, allowing the passive driver to move the same amount of air in either direction. Coupled with the active driver, the SLAPS enables the sub to deliver louder bass without using more power from the amplifier.

The deep luxurious black/White piano lacquer begins with a thorough sanding and priming, followed by multiple applications of black or white lacquer with additional fine sanding between each layer, and finished with a smooth, high gloss clear coat.

Features:

- SLAPS patented passive radiator system
- Passive tuned design for unmeasurable accuracy
- 320-Watt class “D” powered amplifier with automatic signal-sensing turn-on and stand-by mode for longer life, more efficiency and less power consumption (greener)
- Sub operation switch for different ranges
- High gloss multi layer piano black or white lacquer finish for a mirror shine
- Long throw, premium quality drivers
- Operation status LEDs
- RCA & high level inputs
- Selective variable crossover

Designed For Use In:
Home Theaters & 2-Channel Music Systems
Town Homes/Condos/Apartments
Rooms Up To 22’ x 32’ x 8’

MiniMe P8V2 | **MSRP**
\$849.00/pc
MiniMe P8WV2 | **\$949.00/pc**
