

300Mbps WiFi Audio Router

The Earthquake ARO-300 WiFi Audio Router is the fastest streaming 2.4GHz WiFi router module on the market. It can handle a data rate of up to 300Mbps, and its DAC supports 24-bit/192KHz. Building on the original AR-300, the ARO-300 maintains the use of open-source apps while offering a superior range and 3.5mm line and optical inputs.

The 2.4GHz band is one of the most common WiFi spectrums due to its long range. Additionally, the 2.4GHz band

can navigate through obstacles with less interference, making it a better choice for streaming music and audio. The proprietary algorithm applied optimizes your bandwidth and produces high-quality audio processing that is ideal for audio streaming in the home and commercial settings.
