

# DBXi Subwoofer - 12D / 15D

## Product Release

## BACK BY POPULAR DEMAND!

Returning in all its former glory, Earthquake Sound has re-released the window shattering, trunk thumping DBXi subwoofer!

Super Wide Edge surround, 1.25" high multi-layer foam pressed and laminated. It allows a cone movement well over 2" without any deformation.

The hot-forged single piece T-YOKE permits a clear flow of magnetic flux. The unobstructed flow of magnetic flux increases the operating efficiency of the driver.

### Turbo Forced-Air Cooling System

keeps the four-wound high temperature bobbin voice coil running cold

### Progressive Design Double Spiders

allows long excursion with perfect linear motion, i.e. no voice coil rubbing

**Highest Quality Tensile Leads** stitched into the spider to eliminate the chance of lead flopping against the spider or cone during extreme movement also it gives the lead longer life as it becomes less subjected to breaking or cracking

Removable rubber gasket that doubles as a seal to prevent air leaks, and at the same time covers screws used to install the driver.

DBXi	MSRP
12D	\$359
15D	\$429
